## Online safety at home:

Senior Parents' Newsletter

With some of our young people learning from home if they test positive for Covid, they will be spending more time online doing their school work, playing games or socialising. Technology is

hugely valuable for education, as well as a way to keep in touch with friends and family. However it's important we all consider how we can help keep young people safer online, and

always. Here's some information about what your child may enjoy online and what you can do to help keep them safer:

### Online Gaming

Online games are social activities, and most have features that allow young people to chat with others whilst they play.

For information about the positives of gaming, the risks of 'in-game chat' and measures you can take to help protect your child, watch this short video:

[In - game chat: A guide for parents and carers – YouTube](#)

### More Information?

Thinkuknow is the education programme from the National Crime Agency's Child Protection Command CEOP (NCA-CEOP) whose aim is to protect children and young people from sexual abuse online.

For more information, advice and guidance, visit their [parents website](#) and download their [home activity worksheets](#) for fun, online safety activities to do with your family.

## Steps you can take to help keep your child safer online

**Have an ongoing conversation:** Continue to talk about the apps, games and sites they like to use, and what they like and don't like and any concerns about being online. Discuss with them when to unfollow, block or report. For help starting this conversation, read [having a conversation with your child](#).

**Make sure they know where to go for support:** Remind your child they can always speak to you or an adult they trust if anything happens online that makes them feel worried or upset. Remind them that they won't be in trouble at that you are there to help. For a breakdown of report services, visit:

[Supporting your child with](#)

[reporting unwanted content online](#)

**Make sure they know about NCA CEOP:** Young people can report a concern about grooming or sexual abuse to NCA CEOP at <https://www.ceop.police.uk/safety-centre/> and get support from a specialist Child Protection Advisor.

## Social Media

You may be wondering when is the best age to let your child have a social media account, or have some concerns if they're already using them. For advice and guidance, read [Is your child ready for social media?](#)

Remember, most social media services require users to be at least 13 years of age before they can register.

Most young people have positive experiences socialising online, but it can be easy for young people to

share things or post things they wish they hadn't.

The simplest way to have information about your child removed from a website, or app is to contact the site itself. Read [reporting to social media sites](#) for more information.

Social media can offer young people opportunities to express themselves and have fun, but they could be exposed to harmful content which might include sexual images or videos which

could impact on their understanding of sex and relationships.

For information, read [Teens and the sexual content on social media](#).

## Online gaming

The PEGI (Pan European Game Information) rating system can be a useful tool to help you decide what online games are appropriate for your child.

For more information on the PEGI system and other factors to consider before deciding what's suitable, read [Gaming: what's appropriate for your child](#)

Gaming is popular with both

children and adults and can help to cure that lockdown boredom! If your child is gaming, you may have some questions about how to keep them safer. If so, check out -

[gaming: what parents need to know](#).

For a guide on the apps, sites and games your child might enjoy, visit: [Net Aware](#).

**Please speak to Mr Masood or Mrs Moon if you have any concerns.**

## Sharing information, images and videos

Young people often share images or 'selfies' and there is potential for some of those to be nude or nearly nude images. Young people share 'nudes' for a number of different reasons, and some situations are more risky than others.

For information about the contexts in which images are shared and how best to respond, take a look at [nude selfies: a parents guide](#).

If your child enjoys being

online and uses social media apps, games and more, it's important you know how to protect their personal information and support them to make safe choices about what they share online.

Read this [parents guide to personal information](#) and [how to protect it](#) for more information to support your child.

Some of the most popular apps, sites and games are

designed to make it easy to share information online. But once information is shared, you can never be sure who has seen it, saved it or shared it.

If your child has shared something online they wish they hadn't – don't panic. Read [my child has shared too much online](#) for advice on how to support your child.

## Livestreaming

Live streaming is now a very popular feature of many apps and platforms, and all you need to livestream is an internet enabled device like a laptop or a smart phone.

If your child enjoys livestreaming, you may want to read [what is](#)

[livestreaming](#) to find out more about it and help your child have a positive online experience.

Over the past few months, many of you may have watched a livestream, or taken part in a video chat. Livestreaming can be a fun

and enjoyable online activity for young people.

If you want to know more about livestreaming, the risks and safe use, watch our short video: [video](#) or download this [handy guide](#).

Please note all the guides and videos can be found on the ThinkUKnow website.
